Day-1 Web scraping

- use requests - for gettting website
- Beautifulsoup- used for parsing html
- use with open for file handling

```
import requests
from bs4 import BeautifulSoup as bs

site = requests.get('https://webscraper.io/test-sites/e-commerce/allinone')
page = bs(site.content,'lxml')
ff = page.find_all('a',class_='title')
for index,f in enumerate(ff):

    with open(f'posts.txt','a') as fi:
        fi.write(f"product {index}:{f.text}\n")
```
